
* **A** course is organized by Dept. of Public Health, but the grade achieved is **calculated into the result of Final Examination in Behavioral Sciences.**
For students starting their studies before the 2020/21 academic year, we account this course as compulsory elective.

GUIDELINE TO BEHAVIORAL SCIENCE COURSES FOR MEDICAL STUDENTS

YEAR 2021/2022

FOR MORE INFORMATION PLEASE VISIT:
http://web.med.u-szeged.hu/magtud/home_eng.html

Dear Students,

We are pleased to deliver you a warm welcome on the occasion of starting your studies for this specifically nice profession. Now you are entering the group of people who have been taking the hard job of mapping disease-causing factors, combating diseases, helping other people, caring, curing, and healing for hundreds of years. The medical challenges of the 21st century need a special foundation of information, knowledge, skills, and attitudes to meet the requirements of behavioral and moral tasks during the job of a physician based upon the Medical Oath. The courses described on this sheet help you develop the appropriate medical attitude.

In year 4, students should take a final exam which covers the knowledge, skills and attitudes learned during the eight previous semesters. Conditions for admission to the examination: completing all compulsory behavioral science courses. (9 credits)
Our courses are built on each other. ATTENDANCE OF THE COURSES IS STRONGLY RECOMMENDED! It is important to meet the requirements of the course and to complete them to apply for the final exam.
