

**Study Requirements**  
**PUBLIC HEALTH AND PREVENTIVE MEDICINE**  
4<sup>th</sup> year pharmacy students

Public health and preventive medicine is taught by 2 hours lecture per week. The participation at lectures is not compulsory, although it is strongly advised.

Lectures will be held at the appointed time and place by the timetable. The PowerPoint presentation of the actual **lecture** will be uploaded to the “Educational materials” folder **in pdf form**, not later than the originally scheduled classroom lecture.

Each lecture is accompanied by a series of control-test questions (10 questions will belong to each lecture); test questions will also be uploaded on the CooSpace. Students must complete these tests by the end of the semester. A test can be fulfilled several times (up to 3 times), but at least once 60% performance has to be per each test, which is the condition of accepting the semester.

The end-semester exam (first, second and third exam) will be organized as CooSpace test. **The material that must be known for the examination is the textbook and the “Educational materials” (lecture slides, other documents) uploaded on the CooSpace.**

There will be 50 test questions on the CooSpace test; various question types will be used (simple choice, multiple choice, paring etc., which were partly present in the control-tests). Every correct answer is equal with 1 point (partial point cannot be gained). During 50 minutes, maximum 50 points can be gained. After answering a question, there is no opportunity to move back to a previous question. The result of the exam will be shown immediately after finishing the exam.

Exam mark is calculated according to the following:

45–50 points:	excellent (5)
40–44 points:	good (4)
35–39 points:	accepted (3)
30–34 points:	passed (2)
0–29 points:	failed (1)

The **educational advisor** is: Dr. Zsuzsanna Máté, mate.zsuzsanna@med.u-szeged.hu. Educational affairs can be managed by e-mail. Emails should contain the full name of the student and faculty, if any of these data is missing then no reply will be.

**Knowledge required**

Public Health and Preventive Medicine. (Ed. Paulik E.) Medicina Publishing House, Budapest, 2013.

“Educational materials” available from Coospace.

All material taught at lectures.
