

## **Dental History Taking in Hungarian**

-FOG-MAE141-TE

The main objective of the History Taking in Dentistry course is to help students develop their Hungarian medical communication skills.

The course is a language based practice. The students broaden their skills in the Hungarian language (both grammar and vocabulary). They learn how to communicate in everyday situations and in basic medical situations with confidence. They also familiarise themselves with Hungarian case descriptions, which helps them with professional and structure-based history taking
