

## English for Sciences

- felzárkóztató angol nyelvi kurzus gyógyszerészhallgatóknak
- GYTKKAM1571

### Aim

The aim of this course is to help students improve their English language skills to have a strong foundation for their further pharmacy studies. Basic grammar and vocabulary is revised with special focus on their usage. The students learn the essential expressions for studying mathematics, biology, chemistry and physics in English.

The language learning process is supported by audio files, exercises and vocabulary lists. The course includes two 90-minute classes every week for one semester.

### Course material

(2006): English for science and technology, Tropical Press
